PRODUCT CATALOGUE

OUTDOOR UTILITY PRODUCTS FOR THE ELECTRICAL CONTRACTING INDUSTRY

INNOVATION

Our company mission statement of Quality, Reliability and Innovation, applies to all of our divisions, with many of the world's leading companies relying on our innovative products and services.

SOURCING

Extensive travel, investigation and due-diligence goes in to choosing our supply chain, which ensures our products are produced with quality components to the highest of standards.

STOCK

Our specially built warehouse and stores house over 2 million pounds worth of electrical, water and lighting component stock at any one time.
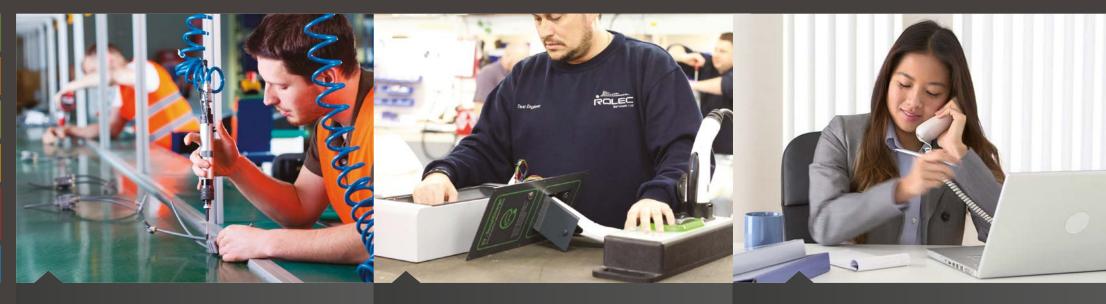

Rolec Services Ltd has been manufacturing electrical equipment for nearly three decades - and remains committed to a programme of continuous development, investment and innovation to ensure the provision of high quality and reliable products at competitive prices.

An award winning company, Rolec Services maintains its position as one of the world's leading specialists in the design and manufacture of outdoor electrical connection, charging, hook-up and distribution equipment.

Established in 1990, Rolec presently employs approximately 125 personnel in its bespoke, purpose-built office, showroom, warehouse and factory complex – in addition to having a distribution network of representatives in over 40 countries.

Rolec Services' wide range of over 2,000 products is still the largest and most extensive of its kind in the electrical industry.

ROLEC

www.rolecserv.com

MANUFACTURING

We manufacture a broad range of high quality outdoor electrical equipment suitable for numerous industries in our purpose built factory in the UK.

TESTING

All products are tested and inspected to meet UK and European standards. We assign a unique serial number to each product to guarantee clients the confidence of traceability and accountability.

CUSTOMER SERVICE

On the rare occasion our Returns Policy is utilised we ask that the product is sent back to us so we can carry out a full investigation.

INSTALLATION OPPORTUNITIES

The 4 x electrical industries that Rolec primarily operate in, i.e. caravan parks, marinas, electrical power solutions and electric vehicle charging, offer the electrical contractor (in association with Rolec Services) excellent business opportunities.

Rolec is always looking for professionally managed electrical contractors to work closely with us on many of the projects we are involved in, or manage, nationwide.

For more details about working with Rolec please contact Rolec Services directly or ask in any electrical wholesaler branch throughout the UK.

ROLEC SPONSORED EV CHARGE POINT TRAINING COURSES

As the UK's leading manufacturer of electric vehicle (EV) charging points and offering Europe's largest and most comprehensive product range, Rolec now sponsor over 30 specialist EV charge point training courses.

These training courses are operated throughout the UK and provide an introduction to the EV and EV charge point industries.

There are a variety of one day and two day courses available provided by the UK's leading training course operators, including City and Guilds, the NICEIC, NAPIT, Trade Skills 4 U, Waxman Energy, Logic 4 Training, DCET Focus Training, etc.

These courses, as well as providing general information relating to the EV industry, also provide hands on practical training on the Rolec range of charging points, as well as installation guidance and regulation advice.

For more details, please contact Rolec Services directly or ask in any electrical wholesaler branch.

ELECTRIC VEHICLE CHARGING

Rolec manufacture Europe's largest and most diverse range of electric vehicle charging solutions.

The demand for electric vehicle charging points continues to increase at a dramatic rate. Rolec EV manufactures Europe's largest and most diverse range of electric vehicle charging solutions and has to date manufactured and supplied over 95,000 charging points to the electrical industry.

Rolec EV's entire product range is compatible with all current EVs and PHEVs and has been tested, certificated and approved by many of the world's leading vehicle manufacturers including Renault, Nissan, Mitsubishi, Kia and Hyundai amongst others.

Our EV charge points are ideal for the home, workplace, commercial and public facing EV charging – with grant funding available for many locations (contact us for further details).

We also offer EV Charge Online - the revolutionary public facing EV charge point management system which enables all EV drivers to simply pull up to a charge point and, using their mobile phone, tablet or in-car connectivity, login to the charge point and pay on the spot for its use. EV drivers do not have to commit to joining any specific network - therefore avoiding unnecessary fees and connection charges. Hosts do not have to pay license fees and can have a charge point (new revenue stream) installed and operational quickly and easily, just by providing an electricity supply.

If you wish to learn more about our EV charging products, or the EV industry in general, please contact us. We also offer training programmes which explain how to become an installer of the Rolec EV product range.

EV charging equipment ideal for:

Home
Workplace
Public

OLEV Grant Funded EV Charge Points

The Office of Low Emission Vehicles (OLEV) are proactively supporting the deployment of EV charge points across the UK by providing millions of pounds worth of grant funding.

To become an official OLEV/Rolec approved installer you will need to attend one of the Rolec sponsored training courses and, with the support and guidance of Rolec, gain OLEV approval.

WallPod:EV HomeSmart

This Mode 3 smart charging wall unit has been designed to provide the user with an interactive EV charging solution for the home. The EV driver can control the charging activity of the WallPod using their mobile phone or any other web enabled device.

WallPod:EV HomeSmart can also monitor and record all charging activity and history as well as provide information relating to total electric miles and CO_2 savings.

The WallPod unit is available in either Type1 or Type2 tethered lead or Type2 charging socket at 3.6kW (16amp) or 7.2kW (32amp) charging speeds and comes with the option of either GPRS or Ethernet back office connectivity.

The WallPod:EV HomeSmart Charging Unit - is part of the award winning, industry leading WallPod range and comes with built-in modem, Mode 3 controller, MID approved kWh meter, overload and fault current protection, electrical contactor and GPRS or Ethernet connectivity.

PRODUCT CODES

- EVHS2010 – 3.6kW (16amp) Type 2 socket (GPRS Connectivity)
- EVHS2020 – 7.2kW (32amp) Type 2 socket (GPRS Connectivity)

WallPod:EV - Socket

This low-cost, entry level Type 2 socket charging unit is designed to offer full Mode 3 fast charging to every Electric Vehicle (EV/PHEV) on the market today.

This charging unit has been specifically designed for domestic and commercial locations including offices, factories, restaurants, hotels, sports venues, etc.

WallPod:EV SuperFast 3 phase (11kW/22kW) versions also available.

WallPod:EV - Tethered Lead

This low-cost, entry level tethered charging unit is designed to offer full Mode 3 fast charging to every Electric Vehicle (EV/PHEV) on the market today and is available with either a Type 1 or Type 2 tethered cable.

This charging unit has been specifically designed for domestic and commercial locations including offices, factories, restaurants, hotels, sports venues, etc.

WallPod:EV SuperFast 3 phase (11kW/22kW) versions also available.

WallPod:EV MultiMode

This low-cost, entry level home charging unit is designed to offer full Mode 3 fast charging via Type 1 or Type 2 tethered lead to every Electric Vehicle (EV/PHEV) on the market today.

This unique charging unit also provides an IP65 weather protected 13amp domestic socket, ideal for home/garden maintenance.

WallPod:EV Ready

WallPod:EV Ready is a low cost unit complete with a IP65 weather protected 13amp domestic socket which doubles up as both an outdoor home/garden maintenance socket and Mode 2 EV charging point.

This unit is ideal for installation on new residential home builds and has been designed to be easily upgraded to full Mode 3 fast charging in the future.

25kW DC Wallbox Rapid Charger

The 25kW DC Wallbox rapid charging unit is a compact yet powerful entry level, cost effective rapid charging option for people on the move.

Ideal for both public facing and private use this robust wall mounted unit is available in a number of different charging and management configurations including:

- Single charging option – 1 x CCS Combo
- Single charging option – 1 x CHAdeMO
- Dual charging option – 1 x CCS Combo / 1 x CHAdeMO

NEW to catalogue

The 25kW DC Wallbox rapid charger has a number of management options including: Free-to-use, key switch control, RFID Smartcard control and the Rolec EV Charge.Online pay by mobile phone solution.

PRODUCT CODES

- EVDC0010 – 1 x CCS Combo / Free-To-Use
- EVDC0020 – 1 x CHAdeMO / Free-To-Use
- EVDC0030 – 1 x CCS Combo / 1 x CHAdeMO / Free-To-Use

25kW DC Wallbox Ground Mounting Stand

The 25kW DC Wallbox rapid charger has been traditionally designed to mount directly onto a wall.

However, there may be circumstances where a wall is not available and to accommodate this we have designed a mounting stand that can be fixed to the ground and support both the Wallbox and the supply cable.

NEW to catalogue

BasicCharge:EV

This pedestal is the brother to Rolec's world-leading Classic utility pedestal, which now boasts well over 150,000 units sold worldwide.

This mass produced, tried and tested pedestal is, we believe, the most affordable and adaptable EV charging pedestal in the world.

This versatile pedestal offers either 1way or 2way Type 2, Mode 3 fast charging socket(s), c/w hatchlock, built-in overload & fault current protection, and LED illumination.

BasicCharge:EV SuperFast 3 phase (11kW/22kW) versions also available.

BasicCharge:EV Token Mech (PAYG)

This pedestal is the brother to Rolec's world-leading Classic utility pedestal, which now boasts well over 150,000 units sold worldwide.

This versatile 1way pedestal offers a simple pay-to-charge solution via its token payment system. It also features Type 2, Mode 3 fast charging socket(s), c/w hatchlock, built-in overload & fault current protection, and LED illumination.

BasicCharge:EV Token Mech SuperFast 3 phase (11kW/22kW) versions also available.

50kW, 75kW, 100kW, 125kW & 150kW DC Ultrafast Charger (UFC)

The Ultrafast (UFC) DC rapid charging station has been designed to offer a future proof solution to the DC rapid charging industry in an investment friendly package.

Investing in a UFC provides you with the confidence that your DC rapid charger will not only charge the EVs of today, but also has the capacity to be upgraded on site for the EVs of tomorrow.

Looking and operating like a traditional fuel pump, it is simple and intuitive to use with a modular design that can be easily upgraded as and when required from the 50kW base model through to the maximum 150kW, 6-in-1 charging package.

Some Of UFC's Unique Selling Points

- **Can be configured for up to 6 charging points including:**
  - CHAdeMO DC charging gun
  - CCS Combo DC charging gun
  - 43kW AC charging gun
  - 3.6kW/7.2kW/11kW/22kW AC charging socket
- **Built to your individual requirements**
- **Can dynamically charge up to 4 vehicles simultaneously**
- **Single or dual sided charging arrangements**
- **Wheelchair accessible control panel**
- **Designed to cope with all British weather conditions**
- **Installation/maintenance and SLAs available**

StreetServ:EV

The Ideal On-Street EV Charging Solution

This EV Charging Post is a robust, hard-wearing and vandal resistant EV charging solution, specifically designed for high risk, susceptible, public locations such as high streets, marketplaces, car parks and sports stadiums.

This post features a Type 2, Mode 3 fast charging socket, c/w hatchlock, built-in overload & fault current protection, and 13A maintenance socket, which can be safely locked away while in use behind its heavy-duty steel access door.

This post is also ideal for private on-street charging applications where security and safety is paramount.

CubiCharge:EV

CubiCharge:EV has been designed to provide temporary Mode 3, Type 2 electric vehicle charging points in 1way, 2way, 3way and 4way formats. It provides 3.6kW (16amp) and/or 7.2kW (32amp) socket(s) to any location.

Ideal for car showrooms, service centres, electric vehicle launches, promotional events, temporary EV parking areas, exhibitions, shows, etc.

Ask us about our available hiring options.

ChargeCheck:EV

This unit has been designed to provide every electrician with the ability to confidently carry out a comprehensive and accurate test of EV Fast Charging stations.

This unique unit is designed to carry out a full range of tests on most 3.6kW (16A) and 7.2kW (32A) single phase, Mode 3, J1772 (Type 1) and IEC 62196 (Type 2) EV charging points.

As well as the standard electrical testing, EV ChargeCheck also allows you to test the Mode 3 communication unit by simulating the communication protocol of an electric vehicle.

- EVTU0018 – 1 x ChargeCheck:EV c/w adapter cable & carry bag

StreetCharge:EV V1

StreetCharge:EV V1 has been designed and developed as a new to install LED street light and EV charging point combination.

This product comes complete with a highway specification street light column, LED street light head, fused electrical cut out and full Type 2 Mode 3 EV charging capability.

StreetCharge:EV V1 is available in 3 charging management formats including free-to-charge, key switch control to charge, or EV Charge.Online - which enables EV drivers to pay to charge via their mobile phone.

Ideal for both private and public facing EV charging.

StreetCharge:EV V2

StreetCharge:EV V2 has been designed as a retrofit EV charging unit that can convert an existing street light into a street light/EV charging combination within 2 hours.

StreetCharge:EV V2 is available in 3 charging management formats including free-to-charge, key switch control to charge or EV Charge.Online - which enables EV drivers to pay to charge via their mobile phone.

Ideal for both private and public facing EV charging.

"Ask about our corporate volume rates"

We also supply a wide range of EV charging unit spares and accessories.

EV Charge Point Branding

Rolec offers bespoke colour and branding options across the majority of its EV charge point range.

These custom options are ideal for corporate branding, colours and logos.

Brand names, logos and trademarks used herein remain the property of their respective owners. This listing of any firm or their logos is not intended to imply any endorsement or direct affiliation with Rolec Services Ltd. and is purely to demonstrate branding opportunities

EV CHARGE.ONLINE – Revolutionising Electric Vehicle Charging

Rolec's EV Charge.Online system has been designed and developed to enable each and every EV driver to simply pull up to a charge point, and using their mobile phone, tablet or in-car connectivity, log-in to the charge point and pay-as-you-charge for its use.

The EV Charge.Online system has been designed with both the EV/PHEV driver and the network operator in mind, and is therefore not subject to the traditional charging network providers' business models, avoiding unnecessary extra charges, such as Annual Membership Fees/Monthly Subscription Fees/Connection Fees/Licence Fees/etc.

With EV Charge.Online there are no additional hidden fees, the EV driver simply pays for the charge advertised.

EV Charge.Online is easily and quickly installed, in most cases only requiring live, neutral and earth and a reasonable mobile phone signal.

The Charging Network Open to Every EV Driver

• No Driver Annual Membership Fees
• No Driver Monthly Subscription Fees
• No Driver Connection Fees
• No Host Licence Fees

Load Manager (Optional)

Electricity load management is an optional advanced software feature that can be applied to the EV Charge Online system.

It has been developed as an electricity load management solution for locations requiring multiple EV charging points where the charging points have a higher collective load potential than the electricity supply available to them.

EV Charge.Online EV charging points that can pay for themselves in less than 12 months!

GroupManager:EV

The private networked EV charging system.

GroupManager:EV allows you to have full control and visibility of your charging network and its charging activity, whether it be a small network with just a few charging points or a large network covering many charging points across several sites.

Ideal for EV fleet management.

Via secure GPRS or Ethernet, you can control and monitor your charging network and activity, allowing charging via pre-authorised RFID cards or fobs.

SuperFast 11kW & 22kW 3 phase versions also available.

RFID Card

RFID Key Fob

Load Manager

Electricity load management is an optional advanced software feature that can be applied to the GroupManager:EV system.

It has been developed as an electricity load management solution for locations requiring multiple EV charging points where the charging points have a higher collective load potential than the electricity supply available to them.

ControlCentre:EV

The ControlCentre:EV has been designed to centrally manage localised multiple EV charging points from a single control panel.

This versatile system allows up to 18 x EV charging points/bays to be managed from the control panel, offering either free-to-use or pay-to-charge options.

This system has been specially designed to be similar in operation to a car park ticket machine. The driver simply parks in the EV charge point parking bay and then, via the ControlCentre, initiates the electric vehicle charging procedure.

Ideal for single level, multi-level and underground car parks.

Control Options:

RFID Card

RFID Key Fob

Token PAYG

Mobile PAYG

UltraSmart EV

The EV charging industry, including both the EV driver and the charge point host, is displaying an ever-increasing thirst for immediate, real time and accurate charge point data, such as charging activity, charging costs, power consumption, availability, etc. In addition, the EV driver has a desire to interact with the charging point via a number of methods including mobile phone and other web enabled devices, RFID card and similar.

Rolec manufacture and supply a number of independent SMART charging solutions which offer these features - including EV Charge.Online, GroupManager EV and HomeSmart EV. These independent SMART charging solutions have been merged within the UltraSMART EV intelligent SMART technology platform, enabling Rolec to offer customers a variety of comprehensive integrated EV charging solutions and services - managed from a single SMART platform.

UltraSMART EV can provide and manage a dynamic, extensive and fully integrated EV charging network covering all aspects of electric vehicle charging, including SMART charging for the home, the workplace and in public locations. It enables customers to design, implement and operate their own bespoke charging network and deploy all aspects of EV charging within a tailor-made management solution.

Just choose the type of charging point(s) from the Rolec range which suit the intended location/environment, and the type of operating system for the charging points (such as EV Charge.Online (mobile phone), GroupManager EV (RFID cards), HomeSmart EV (GPRS connectivity), etc.). These choices form the basis of the charging network, which is then entirely tailored, operated and managed by UltraSMART EV - which can incorporate a range of other impressive features, including Battery Storage Integration, Third Party Connectivity, DC Rapid Charge Integration, Maintenance Reporting, Electric Load Management, etc.

THE NEW

PLATINUM

RANGE

The new Platinum Range introduces a superior high quality brand of modular switchgear, kWh meters, time clocks and other similar din-rail mounted electrical components at very competitive prices.

This Platinum Range has been created after extensive travel, investigation, testing and due-diligence in choosing the right high quality components sourced from the most professional and reliable suppliers.

The new Platinum Range includes:

• MCBs
• RCDs
• RCBOs
• Isolators
• kWh meters
• Time clocks
• Contactors

Ideal for:
Caravan hook-ups
EV charging points
Industrial combination boxes
Utility pedestals
Electrical distribution panels & units
Consumer units

ELECTRICAL HOOK-UPS, DISTRIBUTION SYSTEMS AND EV CHARGING POINTS FOR CARAVAN PARKS

Rolec have manufactured electrical hook-ups and distribution systems for caravan and holiday home parks for over 25 years. As the UK's largest manufacturer of this type of equipment we are able to produce panels and pedestals providing electrical hook-ups, water supplies, LED lighting, TV connections and telephone points.

All our electrical hook-ups can be manufactured with or without kWh meters and are able to supply caravans and residential units in 16amp, 32amp or 63amp formats. They come complete with both fault current and overload protection in the form of either MCB/RCD or RCBO.

Recent introductions to our hook-up range include our new SmartCard metered hook-ups as well as the new PitchSmart web based online metered hook-up units which allow every caravan electrical supply to be easily switched on/off and monitored remotely via the park's office based computer.

We also manufacture a wide range of EV charging points designed to suit the caravan and residential park industry.

Ideal for:
Caravan parks
Camp sites
CL sites
Event areas
Theme parks
Showgrounds

SU1 Static Hook-Up Unit

The SU1 is a hard-wearing, cost effective hook-up unit specifically designed to provide either a 6amp, 10amp, 16amp, or 32amp unmetered electrical supply via a BS4343 IP44 electrical socket to the static caravan.

Each unit comes complete with an RCBO providing both overload and 30mA fault current protection, accessible via a waterproof customer re-set flap, as well as a set of 3 x 35mm incoming cable connection terminals.

SU2 Static Hook-Up Unit

The SU2 is a hard-wearing, cost effective hook-up unit specifically designed to provide a MID approved kWh metered electrical supply in 6amp, 10amp, 16amp, or 32amp via a BS4343 IP44 electrical socket to the static caravan (optional SmartCard Metering available).

Each unit comes complete with an RCBO providing both overload and 30mA fault current protection accessible via a waterproof customer re-set flap, as well as a set of 3 x 35mm incoming cable connection terminals.

SU2 Smart Metered Hook-Ups

SmartCard metering is Rolec's best-selling and industry leading metering solution and has been specifically designed for the caravan and holiday home park industry. This advanced form of SmartCard metering is the perfect, low cost solution to providing pre-payment electricity metering to both static and touring caravans, as well as residential homes.

Contact us for details of MID approved SmartCard metering, as well as our new computer managed metering system utilising GSM mobile technology.

SU2 PitchSmart Metered Hook-Ups

The new PitchSmart Online electricity, water and gas management system is an innovative, cloud based, web enabled system designed to provide the caravan park operator with full managerial control of their entire park's electricity, water and gas services from a single office based computer.

PitchSmart Online can also manage the services of the park's offices, retail outlets, buildings, street lights, etc. and feed all of this information back to the park's office based computer for invoicing, analysing, etc.

RU1 and RU2 Residential Units (Non-Metered & Metered)

The RU1 is a hard wearing cost effective non-metered connection unit specifically designed to provide 16amp, 32amp or 63amp electrical supplies via its direct connection facility to the residential home.

The RU2 unit is exactly the same as the RU1 unit with the addition of a suitably sized MID approved kWh meter.

Both RU1 and RU2 units come complete with an MCB/RCD providing both overload and 100mA fault current protection accessible via a waterproof customer reset flap.

Classic Pedestals

The Rolec Classic utility pedestal is the world's most popular utility pedestal having been in service for 25 years, with well over 150,000 sold worldwide, providing vital utilities to marinas, boatyards, caravan sites, car parks, railways, sports stadiums, etc.

"We manufacture to your individual requirements"

Classic Midi Pedestals

The internal galvanised steel chassis makes the Classic utility pedestal extremely strong, and its endless service configurations make it massively versatile.

StreetServ

A heavy-duty, hard-wearing street post that offers lockaway electrical connections.

This round top column has a gloss finish.

Ideal for market places, town centres, car parks, etc.

PowerMaster

Underground pop-up electrical supplies. Electrical supplies are provided from an IP55 enclosure, which can be discreetly placed away in a drive-over capable galvanised housing when not in use.

All units come with individual socket overload protection and either individual or grouped fault current protection. They are ideal for market places, car parks, etc.

## MARINA UTILITY PRODUCTS

World leaders in the design and manufacture of marina service pedestals and products.

Rolec has been manufacturing marina service pedestals and associated products for over 25 years and is considered to be the world's leading specialist in the marina services industry.

As well as the manufacture of marina service pedestals we also manufacture emergency service equipment, sanitation pump out systems and pontoon lighting.

Contact us for our dedicated marina services catalogue.

Ideal for:
Marinas
Canals
Boatyards
Ports
Coastguard HQs
Fishing lakes
MOD facilities

Classic Pedestal

The Rolec Classic pedestal is the world's most popular marina service pedestal, having been in service for 25 years. An internal heavy-duty, hot dipped galvanised steel chassis makes the Classic pedestal extremely strong, whilst the choice of external skins, available in stainless steel, aluminium, Foamex, or composite, make the pedestal durable and easily maintained.

The Classic pedestal is available in a variety of sizes, offering optional LED lighting and limitless electric, water, TV, data and metering service combinations. SOS pedestals are available in the Classic range.

- MACA0041 – 750mm, 4 x 16amp sockets, 4 x RCBOs, isolator, 4 x MID SmartCard meters
- MAFA0030 – To add LED Lighting

The Classic pedestal range can also come with either MID approved, Class 1 accurate, 1 modular kWh meters, or SmartCard meters.

Quantum Pedestal

This exciting new range of anodised aluminium pedestal brings a modernisation to our range whilst maintaining the same versatility to our pedestals that the Classic range delivers.

This range can provide entry level services from 16amp single phase inland marina supplies up to international superyacht supplies of 250amp three phase. It is able to accommodate services on all four sides, comes in an array of colours and sizes, and really does offer every level of solution.

Mains and Distribution Units

Our cost-effective electrical shore isolation panels and distribution units are manufactured on a project by project basis to suit your exact requirements and are available in GRP and stainless steel.

We manufacture distribution panels/units from simple 63amp single phase versions, through to 1600amps three phase units.

All our panels/units can come with optional galvanised steel stand and cable covering shroud.

PRODUCT CODES

- STDU0010   004 - 100A 4P Isolator - 3 x 63amp 1P MCBs
- STDU0020   004 - 100A 4P Isolator - 6 x 63amp 1P MCBs
- STDU0030   004 - 125A 4P Isolator - 9 x 63amp 1P MCBs
- STDU0040   005 - 100A 4P Isolator - 3 x 63amp 1P MCBs
- DUAD0790   004 – GM Pillar and Shroud
- DUAD0800   005 – GM Pillar and Shroud
- DUAD0810   006 – GM Pillar and Shroud

Water Stands

Low cost galvanised steel water stands providing ½" water tap complete with anti-contamination valve and 30metres of food quality hose pipe.

PRODUCT CODE

- MANF0020 – Galvanised Steel Water Stand with Hose Hook - 1 x Water Tap – 30m Pipe

Roline Unit

Our Roline Units are powder-coated aluminium units able to provide low level sockets, metering and illumination - ideal for pontoons wanting to keep services implementation to a minimum.
